## Expanding our warehousing footprint in the Netherlands

Our new warehouse in Venlo, The Netherlands, brings the total logistics surface to 120,000 m<sup>2</sup>

We will add another 30,000 m<sup>2</sup> to our current logistics facilities in Venlo, bringing the total logistics surface to 120,000 m<sup>2</sup>. The new warehouse will be our third full service logistics facility in Venlo and will be located adjacent to our two other logistics sites, situated just 1 km down the road from the DSV Road terminal.

### Strategically located

The Venlo area has consistently ranked as the top logistics hotspot for European distribution centres over the past seven years and has traditionally been a stronghold for both logistics and road operations. The current multi-user warehousing operation already has a wide variety of consumer products and healthcare customers who use Venlo as a hub, from which they serve their entire European customer base.

### Organic growth

The new facility was needed to accommodate the organic growth generated by existing customers as well as the addition of several new contracts.

***"We see a growing demand for order fulfilment, especially from companies that are active in E-commerce,"*** Peter van der Maas, Managing Director in DSV Solutions, the Netherlands, explains. The expansion will create 100-150 new jobs.

---
